BREAKING NEWS!

ProCup APP is here, ready to be downloaded from Google Play eller Apple Appstore

As we wrote in our previous newsletter this project has

taken more time and has also become much more expensive than we could ever anticipate.

Now it´s ready and we can launch ProCup app for IOS and Android. On the next pages you will find more information on how to use it and what advantagaes there is for you and your tournamnet. All ongoings tournaments is activated, do you wish to go back to the HTML-app you do that in Design startpage.

Handle the app through ProCup admin

The difference towards the old HTML-app won´t be that big if you lookat it fron an Admin perspective. You will still be able to upload images, sponsorlogos and create menues. All this is found in admin as before.

The bif difference is that you download it as an app to yur phone from Apple Appstore / Google Play. There will be a search function at startup where you and all users will find the tournamnet the are visiting. In other words you can easily change between tournamnents in the app. The App is free to use both for organizers and visistors with the addition that it comes with ProCup sponsorlogos. Do you want to expose your own sponsors you have to buy out that function in Admin. In the future it will also be possible to buy your own tournamnet app visible and searchable in appstore / google play. This feature is planned for release after summerbreak.

Another feature of the app is that there will be notifications, ie if a visitor follows a team then it pops up info in the app when some favorite team has played.

There is also a link to Facebook and comment fields on each match.

As soon as you create a new tournament, the new app will automatically be activated.

If you already have an active tournament, and you ´re in the registration phase, you can choose to activate the new app. You do this under Design and settings > 3. Design startpage.

Phone/Android App or HTML App	
Use iPhone/Android App: ⓘ	☑ *If not checked, our HTML App can be used instead.*
Counter on start page	
Show total number of registered teams:	○ Yes ● No
Show counter with days left to tournament start:	● Yes ○ No

Check the option and proceed by clicking the Save button - continue to the app.
We believe this upgrade will give your organizers an even better ProCup experience.

The app is activated for all ongoing cups, if you want to go back to the old HTML app you make that setting in the design homepage.

When the icons in the upper right appear in admin and on the websites it is running but it is close now.
WATCH OUT!
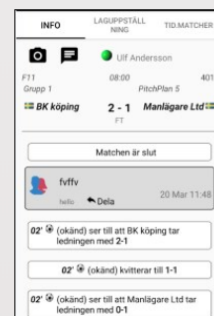

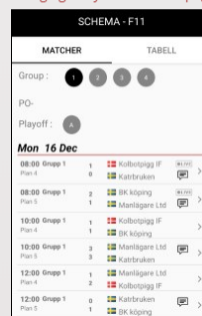

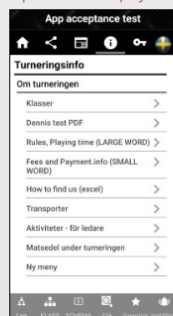

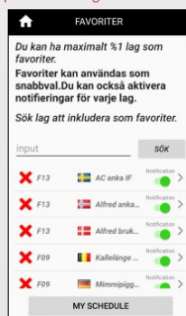

New Cup - app

Run the app through ProCup admin

Settings for iPhone/Android App

With ProCup App you can increase the quality of your tournament. With the help of your mobile phone or tablet, can visitors follow results, see news, visit sponsors etc. ProCup App can be used from the REGISTRATION PHASE. It is great for team leaders to register their team and players via the app.

The app has connection to Facebook and allows visitors to comment on their team's games and share photos. You as a cup organizer can also easily upload pictures during the tournament. These pictures are displayed under the image gallery on the homepage

The app can be downloaded from Appstore (iPhone) or Google Play (Android). Search there at ProCup Tournament.
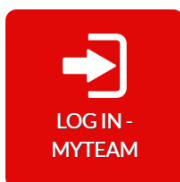

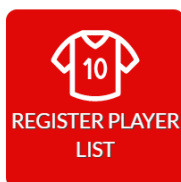

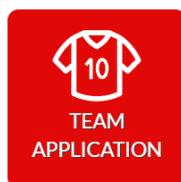

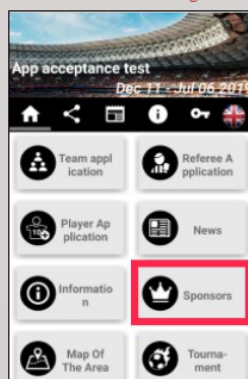

Purchase the app without external advertisers:

BUY *Amount to redeem sponsors for this tournament: SEK **160**.*
An invoice will automatically be sent to your email address when you click SAVE

View sponsors gathered on one page:

☐ *The information is designed under 6: Upload sponsor logos*
