

# Create Gameschedule" Covid-19 adjustment"

Here we look at three scenarios for covid-19 custom timing securing that as few teams as possible are active at the same time in the tournament.

The basic principle is that one or two groups finish playing their matches and then comes the next one or two groups.

**NOTE! ProCup takes no responsibility for your tournament being conducted using these guidelines. Covid-19 rules nationally and regionally, each cup organizer must check carefully and follow. The guidelines thus only constitute support for how you can create a game schedule with a minimum number of teams active at the same time.**

## Scenario 1

One class - 3 groups with 4 teams. Each group finalise its matches and the playoffs are played on day 2.

Set playing time and minimal break between matches (suggestions below) Here you also get suggestions on how to set the different rounds at the bottom of the picture.
